About Us

PT. Original Jernang Asia (OJA) is an Indonesian company specializing in the sourcing, processing, and export of Indonesia's natural commodities to international markets.

Our main export products include Jernang (Dragon's Blood Resin), Kemenyan (Benzoin/Styrax Resin), Agarwood, Dammar Gum, and Kratom (*Mitragyna speciosa*), along with a wide range of other Indonesian natural commodities with strong potential to meet global market demand.

PT. Original Jernang Asia (OJA) focuses on developing and marketing premium-quality natural commodities sourced from North Sumatra and Aceh, Indonesia. Beyond our core products, we also provide trading and sourcing solutions for a diverse range of Indonesia's leading natural commodities to serve the needs of international buyers.

We are committed to connecting Indonesia's natural wealth with global markets through professional sourcing, quality control, processing, and export operations.

Vision & Mission

VISION

To become a strong, trusted, and financially solid export company; a leading player in Indonesia's natural commodities trade; and a globally recognized company distinguished by product quality and professionalism in international trade.

MISSION

- To become a leading and trusted company and producer in providing a diverse range of natural commodities with superior quality and competitive prices.
- To strengthen our brand equity and build a strong corporate reputation through quality, integrity, and excellent customer service.
- To establish sustainable relationships with farmers and suppliers while supporting the development of Indonesia's natural commodities supply chain.
- To fulfill our corporate social responsibility and contribute positively to farmers, local communities, and the surrounding business environment.

OUR JOURNEY BEGINS

Rooted in Indonesia's rich natural resources, we start with commitment, integrity, and a vision to bring the best of our land to the world.

**CONNECTING
INDONESIA
TO THE WORLD**

Delivering premium natural commodities with reliability, sustainability, and excellence to create value for a better future.

Our Journey

Since its establishment in 2016, PT. Original Jernang Asia has continuously expanded its trading and processing activities in Indonesia's natural commodities sector. Jernang has been one of the company's key commodities and an important part of our journey.

From this foundation, we have gradually expanded our trading activities to a broader range of Indonesian natural commodities. This development has led the company into international markets and enabled us to establish trading relationships with buyers from various countries.

Our experience in sourcing raw materials, processing, inspection, packaging, quarantine, and shipment has become an integral part of our operational journey and expertise. Today, our activities encompass the trading and processing of various natural commodities to meet the needs of both domestic and international markets.

PT. Original Jernang Asia has obtained approval and registration with the GACC (General Administration of Customs of the People's Republic of China) to export selected Indonesian commodities to the Chinese market. This achievement reflects our readiness to meet international trade requirements and expand market access for Indonesian natural commodities globally.

We also provide export undername services for producers and commodity owners who do not yet have their own export facilities and legal authorization, helping them access international markets through our established export capabilities.

Our Business

Natural Commodities Trading

The commodities that have become part of our trading activities include Jernang (Dragon's Blood Resin), Agarwood, Benzoin, Dammar Gum, Bigar Bambu, Lidi, Betel Nut, and various other Indonesian natural commodities.

We continue to build strong relationships with farmers and suppliers to support reliable raw material availability and the sustainability of Indonesia's natural commodities supply chain.

Processing

PT. Original Jernang Asia is not only engaged in commodity trading but also carries out the processing of selected natural raw materials.

For Jernang in particular, our production process consists of several stages, starting from the processing of raw fruit into Jernang powder, followed by further processing into solid blocks.

These processes are supported by the production facilities and machinery owned and operated by the company, enabling us to maintain product quality and consistency.

Our Business

Quality Control & Laboratory

Quality is an essential part of our natural commodities trading activities. To support quality assurance and monitoring, PT. Original Jernang Asia operates a dedicated laboratory along with production facilities that support the processing of raw materials.

These facilities are an integral part of our efforts to maintain product quality and consistency before our products are marketed and delivered to buyers.

Export & International Trading

We have extensive experience in the trading and international shipment of Indonesian natural commodities.

Our company portfolio includes shipments of various commodities to several countries, including China and India.

Our experience covers the entire export process, from product preparation, packing, and quarantine inspection to final shipment, ensuring that products are handled professionally and in accordance with international trade requirements.

Company Legality

Company legal documentation is an integral part of PT. Original Jernang Asia's commitment to conducting its business operations in a legitimate, compliant, and professional manner.
